

How to Load the Custom Shape “Thirds”

First download the file ***thirds.csh*** and save it in a location on your system which you will remember.

Click on the ***Shape*** tool on the Toolbar. Then click on the arrow beside the Shape list.

When the drop down list appears, click on the small right hand facing arrow.

Click on ***Load Shapes ...***

In the window that appears, navigate to the location where you saved the file ***thirds.csh*** and click the file name. Then click ***Load***

The shape will now appear in your custom shape list.
